IN THE SPECIFICATION:

On page 98, please amend the paragraph beginning at line 1 as follows:

-- This application is related to copending and commonly filed U.S. patent application Ser. No. 08/570,384 entitled "A PREDICTIVE DATA ENTRY METHOD FOR A KEYPAD" of Alain Rossmann, which is incorporated herein by reference in its entirety. --

IN THE CLAIMS:

Please add the following new claims:

119. (New) A method of operating a network node coupled to a wireless network and to a wireline computer network, the method comprising:

receiving requests for resources located on the wireline computer network from a plurality of mobile data-capable wireless communication devices on the wireless network;

responding to the requests by using the network node to obtain the resources over the wireline computer network and to send the resources from the network node to the mobile data-capable wireless communication devices over the wireless network; and

operating the network node to control access by the mobile data-capable wireless communication devices to payment-based services on the
